Calculating Fast Food Total

Your group needs to spend \$10 in a fast food restaurant.

Your goal is to get as many items as possible with \$10.

You cannot get more than 2 of the same items.

(Remember to include tax in your calculation. In Hawaii tax is 4.5%)

*Use the table below to organize your calculations
(use the back of the paper to show your work)*

BURGER KING		MCDONALDS	
Item name	Price	Item Name	Price
Subtotal		Subtotal	
TAX		TAX	
Total		Total	

Based on your calculations, what restaurant would your group buy from? Explain your choice.
